

# To-Do List UI

## MainActivity Page

This is the main UI page which the customer will observe and interact with. It contains an Add button to allow Users to add their tasks in the list.

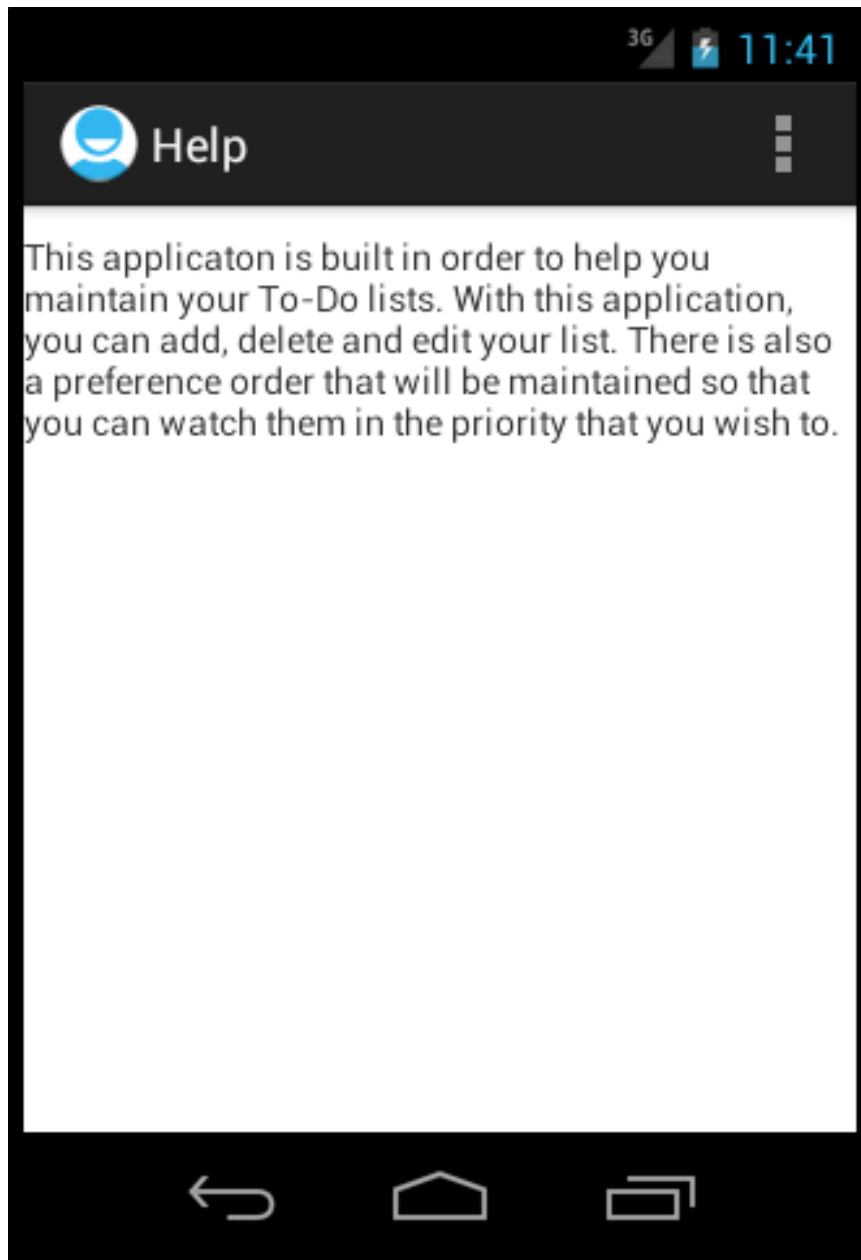

## Screen-shot 2:

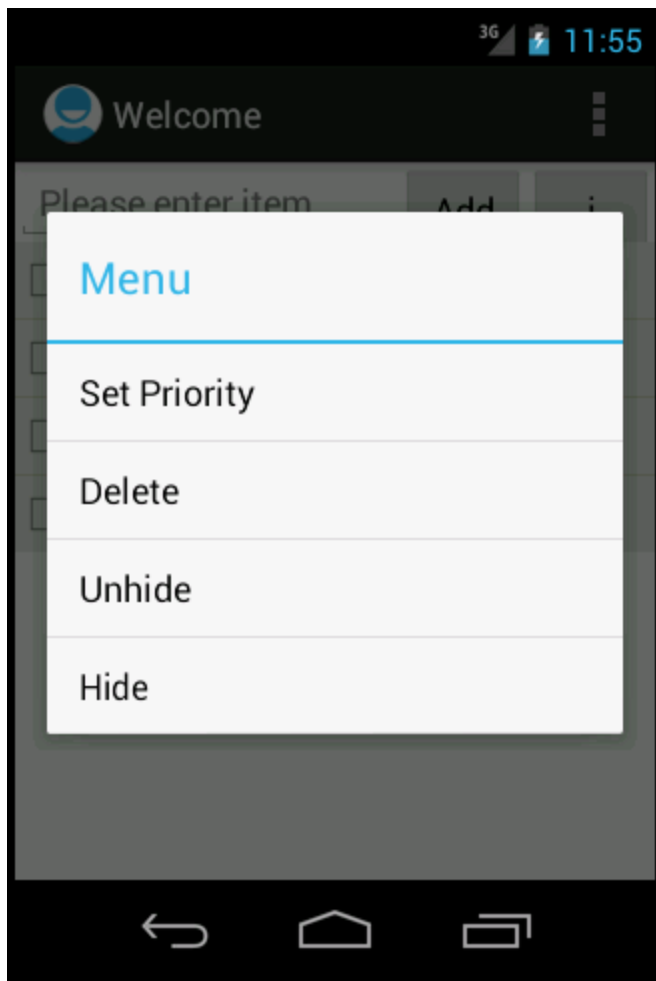

As we can see in the screen-shot above, the checkbox against each task lets the user hide/unhide each of his tasks. The utilities to be added include details of each task when clicked on it, delete, edit options and multiple user option.

The "i" button on the top right corner is a help menu for users facing difficulty while operating the To-Do list.

## Help Menu Screen

## Functionality Page

This menu can be opened by clicking on a row of the list. This menu provides the functionality of deleting, editing, hiding and unhiding the list items.
